

## Recommended Summer Math Practice for Rising 3<sup>rd</sup> Graders

Dear Parents and Students,

To maintain math skills over the summer and prevent the “summer slide,” the Lower School teachers are sharing some summer math practice with all students. Spectrum Word Problems (see attached) has been carefully chosen by the Second-Grade teachers for their rising 3<sup>rd</sup> grade students.

Chapters 1 – 4, 7, and 10-13 are recommended as reinforcement of skills learned in second grade. Chapters 5, 6, 8, and 9 also provide extra practice, but include concepts that may not have been fully mastered.

A few items to note:

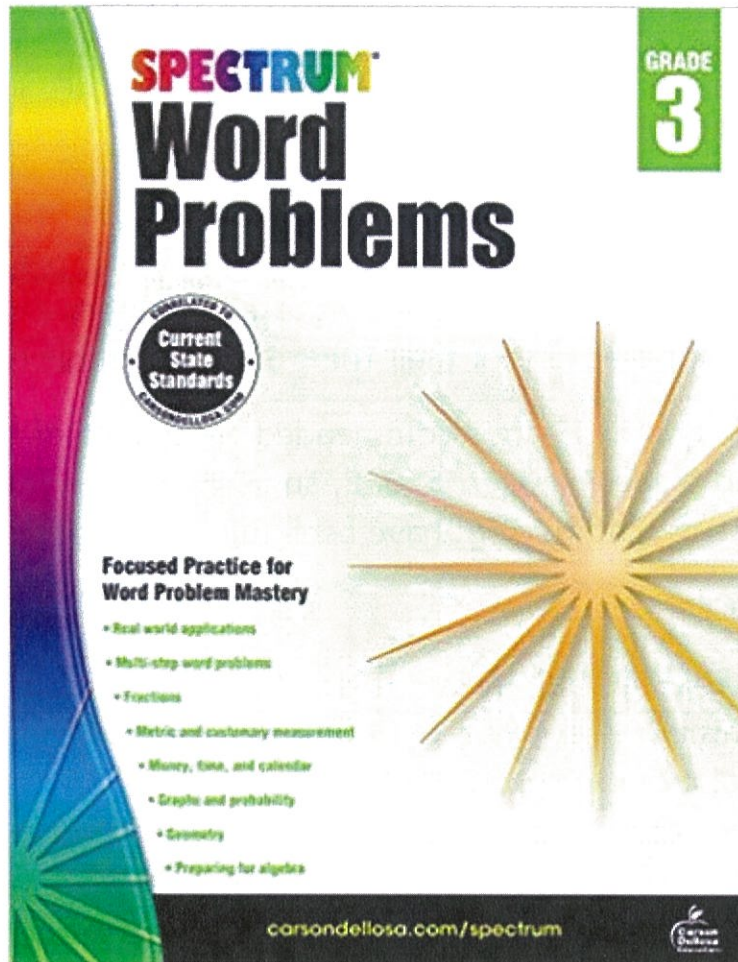

- **RECOMMENDED** - Summer math practice will not be graded by the teacher. This is not required, but it is highly recommended. Answers/solutions are provided in the back of the book to check for understanding and to use as a tool to identify areas that may need improvement or additional practice. This is not something that has to be done in its entirety, and isn't intended for everyday usage, but a little practice along the way is sure to make a difference to start the new school year.
- **REQUIRED** - It is required that all students practice and know their addition/subtraction facts 0 – 20 to begin the school year. We expect 100% mastery of fact fluency in the 3<sup>rd</sup> grade.

Have a great summer!

Thank you,

Jessica Combs
